MY LIFE PHILOSOPHY

KISS: "Keep it Simple, stupid."

PRESENTATION

In both development and data valorization, I am qualified. For now, I am working as a Team Leader, where I enjoy developing new applications and customizing the various technological possibilities for "E-health problems" from scratch.

Additionally, obtaining a master's degree has enabled me to sharpen my analytical and data-valuation methods.

With the aforementioned qualities, I consider myself the best candidate you are searching for.

LANGUAGES

English
French

STRENGTHS

Hard-working Open-minded Curiosity

Flexible Awareness Respect-full

Java, J2EE

JavaScript JQuery Bootstrap

CSS3 Html5 Angular

VCS : GIT, SVN

BAS : maven

PM Methodology : Agile, Scrum

INTERESTS

- Watching and reviewing movies/series (Vampire Dairies, Jab We Meet,...)
- Sport : Walking, Swimming

EXPERIENCE

Team Leader (java J2EE/JavaScript) :

📅 august 2021 – Ongoing

📍 GPI Group - GPI France

- Take part in the process of defining the technological road plan.
- Monitoring the DDD architecture for e-health solutions.
- Monitoring the application performance (versions, database, dependencies).
- Managing the team and resources.
- Code Review and developing complex functionalities.
 - **key words:** Spring, Struts 2, Angular, JQuery, Bootstrap, Mss/Oracle, SonarQube, Git, Rest API, TDD.

Full Stuck Engineer (java J2EE/JavaScript) :

📅 July 2019 – august 2021

📍 MEDINFO -Tunis

- Developing web applications.
- Recommending changes to optimize algorithmic efficiency.
- Test and validation of in-process codes.
 - **key words:** Spring, Struts 2, JQuery, Bootstrap, Sonar, Git, JUnit.

Master thesis : Generic Multi-Level Trust Model for Smart City:

📅 May 2020 – April 2021

📍 ISG -Tunis – SMARTLAB

- Proposing a trust evaluation model to identify, estimate and form trust relationships among Smart City (SC) components.
- Preserving a generic resolution of trust parameters while considering the application context.
- Proposing weighted sum approach to assess trust attributes.
- Carry out a graphic interface to display results .
 - **key words:** Java, Trust management, Context-aware

End of studies project : Developing a web application to manage the employees and residents profiles:

📅 February 2018 – June 2018

📍 FSEGT -Tunis– ESPRIT

- Managing access control using spring security framework.
- Managing the medical files of residents.
 - **key words:** Spring Boot, JQuery, Bootstrap, Thymeleaf, MySQL

EDUCATION

Data Scientist : Methodes intelligentes pour l'aide a la decision

📅 2020

📍 ISG-Tunis

IT applied to management

📅 2018

📍 FSEG - Tunis

Mathematics baccalaureate

📅 2015

📍 Med Annebi RasJbal-Bizerte
